

COVID-19 SAFETY PROTOCOLS

We have implemented additional safety measures at ALL TOMO OFFICES and ONSITE TESTING to help slow the spread of COVID-19.

- Tomo staff will sanitize the testing location upon arriving, between each collection, and at the end of the testing session to ensure it is sanitized. This includes wiping down restrooms, pens, door handles, laptops, etc.
- Collectors will wear masks at all times during testing and while onsite at your facility.
- Staff will wash their hands according to CDC recommended hand-washing guidelines, and remain gloved during testing at any location.
- Our staff will sanitize their gloves between each donor.
- Donors as always will continue to be required to wash their hands before and after providing a urine specimen.
- Donors are asked to wash their hands before and after providing a specimen.
- As Tomo is following guidelines and safety protocols, please allow extra time between each test to allow our staff to sanitize the testing area.
